Recommendation Letter

To whom it may concern,

I know Mrs. Roua ROMDHANE from the time that she has carried out her Graduate Diploma at ENSIT. I was her teacher of several courses such as control of nonlinear system, programmable logic controller (PLC) etc. Her sincerity, hardworking capabilities, good team collaboration and urge to learn made her an active participant in class always.

Roua has shown outstanding electrical analysis and computer science implementation skills that allows her to excel in any projects and enable her to contribute at an early stage of his professional working experience. It is thus my opinion that, Mrs. Roua ROMDHANE has a high level capability for analytical thinking and engineering backgrounds in industrial systems control as well as algorithmic and software skills that allow her to fulfill the project requirements with a high-level of achievements and fruitful results.

Having previous knowledge about Roua ROMDHANE achievements, I have no doubts to support and recommend her for admission to do her internship (graduation project) in your company.

Tunis, May 20, 2022
